

A natural and spontaneous way for escaping from the maze of tourist offers.

Hello Jérôme! I can give you advices on **events, activities, accommodation, food** and **sightseeings** in your destination !

i want to get fun this afternoon and a bit of culture in the morning

do you have a **car** or will you use **public transport** ?

No car, we will use public transport

the **weather** this afternoon is not very good, there is a **88% chance of rain** ... so let me propose an indoor activity, are you ok with this?

Ok

Ok, it is **9AM** right now, so here is a first proposition:

MAMAC: Museum of Modern and Contemporary Art

Hours: Open daily from 10am - 6pm

Address: Promenade des arts, 06200 Nice

Tel: +33 (0)4 97 13 42 01 / Price: \$6 (full price)

More results >

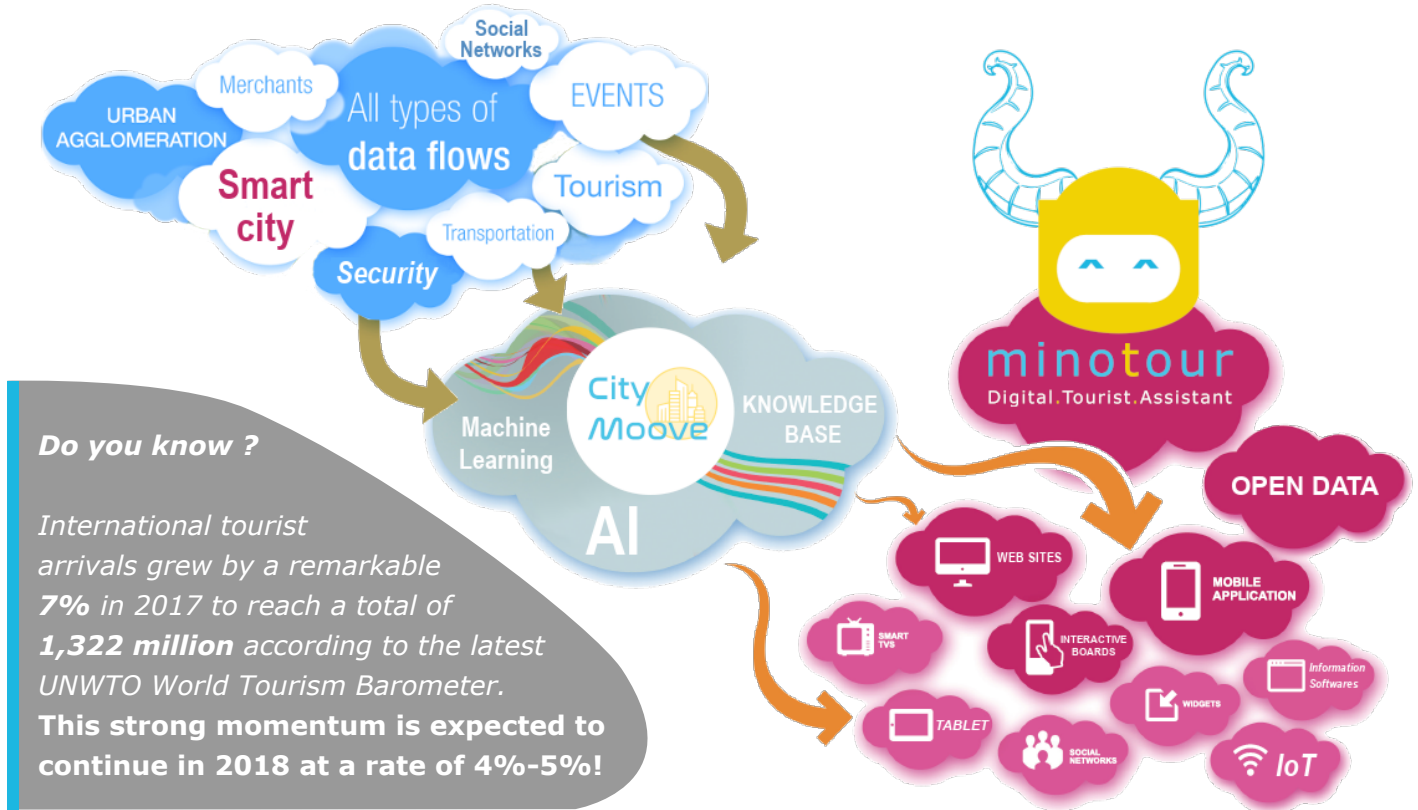

The next bus is **9:45**, **200m** from your location, **No. 45 Place Garibaldi**. The trip will take about **18 mn** and will cost **\$8**. Are you ok with my proposition?

yes

Great ! Next I propose a **restaurant and an escape game** as indoor activity!

Our ambition is to provide a real **smart city** tool to local authorities and other private tourist companies, a next generation **digital personal tourist guide**, able to reply and even more to all **tourists** and **citizen** needs.

Do you know ?

International tourist arrivals grew by a remarkable **7%** in 2017 to reach a total of **1,322 million** according to the latest UNWTO World Tourism Barometer. **This strong momentum is expected to continue in 2018 at a rate of 4%-5%!**

Minotour takes travel experience to the next level ...

... by making the search of tourist attractions fast and entertaining in a simple popular messaging system. It suggests places or events based on a breakthrough semantic technology called **City Moove** which gathers tourist information sources (public & private feeds, social media, Data bases, ...). Then, the user can chat with Minotour exactly as he would do with a **tourist guide**.

But we do not want to stop there: **contextual information** and **services** are also paramount. Minotour will grant advices and propose results according to contextual information such as weather or transportation. For example, it is not a good idea to propose to go hiking in a spot not served by public transport while it is raining there!

About Data Moove:

Data Moove is a start-up created in 2014, located in Sophia Antipolis (France), in order to provide solutions for sharing and organizing big data for tourism via new technologies such as AI, Natural Language Processing, Machine learning and Knowledge graphes (Semantic).
